

By installing automated sensors around your facilities, you'll open up a world of in-depth insights into how your office space is utilized so that you can take the necessary steps towards reducing excess costs and lowering your operational expenses, holding employees accountable, and improving occupier experience with a more efficient office space.

QUICK & EASY SETUP

Simply scan the QR code then place wireless sensors under desks and on walls of each workplace you'd like to monitor.

OCCUPANCY DATA HISTORY

Watch your data come to life with real-time and historical reporting and trend visualization graphs.

ERRORLESS TRACKING

Gone are the days of unreliable human eye-tests. Our wireless sensors track occupancy frequently, 24/7/365.

ALERTS

Receive customized alerts via text message and email based on the conditions & rules you set, sent directly to your desired recipients.

REMOTE MONITORING

Check in on occupancy on 1 or 100's of workspaces, view reports and manage alerts all from our mobile app or web dashboards.

TINY FOOTPRINT

Wireless sensors run on batteries lasting up to five years, uploading data securely to our cloud with zero impact on your existing IT.

DID YOU KNOW?

60%

Of the working day an employee is away from their desk

40%

Of office space typically utilized

\$26

Per square foot
Average amount wasted on operational costs each year

ROI

One case study showed on average over \$3 MILLION in savings per year

20% ↑

Increase in workspace utilization

30% ↑

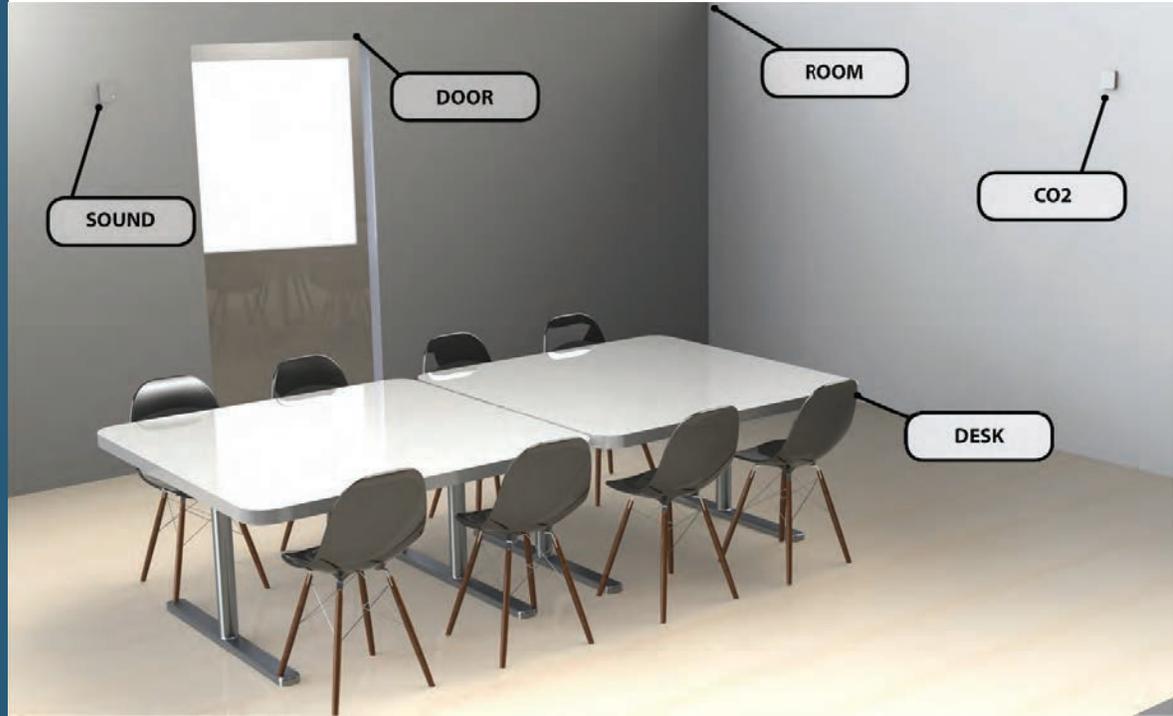

Increase in office capacity

2X ↑

Twice as likely to report cost savings or cost avoidance opportunities

EASY AS 1-2-3

Wireless workplace sensors make system installation fast and easy. Does not require any cabling works or any special mounting procedures. Data comes to life in your dashboard, showing you both real-time and historical data for space management and analysis.
